

Boards:

+Add Board

When “Add Board” is clicked the following dropdown is shown:

Board Type:

Information | Link | Download

Depending what is selected, the correct form is then loaded below the dropdown:

Information (this is the current type of Board)

Title*:

Board*:

HTML EDITOR

Upload File(s)

Multiple File Upload is a new field for this board. Attachments would appear to download (file icon + file name) above the board content, below the title.

Save

Upload File

This can only be 1 file as it will download the file when the board is clicked

Save

The table of all the boards would show below with the ability for them to move up/down. I would like a column for “Type” to be added to the table.
